

Join Elwood Safety's Rotation Program !

It's the easiest way to ensure your equipment is always compliant!

Here's how it works:

- 1) You will have two sets of protective equipment for your workers.**
- 2) You send in one set of equipment to be tested while the other set remains available to your employees.**
- 3) When you receive your newly tested equipment, ship your other set to our lab leaving no gap in your compliance.**

That's it!

Our Rotation Program offers the following benefits:

- We make sure your equipment is tested and returned to your facility when you need it.**
- Testing reminders become a thing of the past.**
- We organize everything for you! Inquire about our custom options. (e.g. individual boxing, employee/company name labeling etc.)**
